

800 acre tract—quarried since 1880

BLACK GRANITE

....the granite with contrast

FRENCH CREEK GRANITE CO., INC.

St. Peters • Pennsylvania

"F/C" black granite

Quarried since 1880 in Chester County, Pennsylvania, "F/C" Black is widely known as a quality monumental granite. Our recent installations of modern equipment now make "F/C" available as architectural granite in standard sizes up to 6 feet by 12 feet.

The attractive variation of color intensity in the polished surface finish creates interesting highlights and character, adding a touch of jewel-like quality to modern buildings; and the very practical aspect is the maintenance-free polished surface, beautifully contrasting with light materials as trim on doorways, spandrels, and base courses.

"F/C" Granite has outstanding structural strength qualities and intense density not found in other building materials. Consequently, thin veneers may be used with confidence wherever required. We recommend, however, a minimum thickness of 2 inches plus or minus 1/2 inch for ease of handling and setting.

Our company is one of the pioneers of the new "Thermal-Texture" finish. This reveals the true characteristics of the granular structure in a warm and mellow appearance. "Thermal-Texture" finish is most suitable for all facades in either formal or informal ashlar, inside or out. It is also very desirable for non-slip tread areas.

Physical Properties:

Compressive Strength	44,100 p.s.i.
Absorption of water	.0016
Bulk Density	3.041
Weight per cubic foot	190 lbs.
